Automotive SPiCE PAM 3.1 available

2017-11-30 14:47

New: SPiCE 1-2-1 for Automotive PAM 3.1 Tool in English & German

The PAM 3.1 released on Nov. 1st 2017 is available starting with Software Version 3.3.0 of the Assessment Tool SPiCE 1-2-1 for Automotive.

Additionally it still contains the PAM 3.0, released on July, 16th 2015.

New: Rule-Checker!

Starting with Software Version 3.3.0 there is a build-in Rule-Checker, which can trigger errors and warnings when you check the consistency of your ratings according to a guideline. Context sensitive rules oder warnings - where certain pre-conditions have to be checked to decide whether the rule applies or not - are not checked by the Rule-Checker, because of missing information. All rules are checked, which are free of contextual information and rely only on the given PA/BP/GP rating.

Beyond the usual assessment features, the assessor can now switch between English and German during the assessment.

Because of structural changes in the process dimension and amongst the generic practices - inspired from ISO 33020 - the assessment files with PAM 3.1 are not compatible with PAM 2.5 (oder 2.4, 2.3) files. Therefore we offer two separate tools: one for PAM 3.1/3.0, the other for PAM 2.5.

The Quest Tool Version 3.3.0 is available for all Quest Tools released on Dec. 2nd, 2017!

All our available assessment tools (SPiCE, CMMI and others) have been updated to reflect the latest version of the assessment core framework which now incorporates features like advanced practices, pre-selected processes and highlighted practices and selection of multiple questionnaires (if provided) and works fine with Win 10, both 32 and 64 bit edition.
