

News and Updates

Version 2.0

2009-07-04 18:24

New in Version 2.0:

- **BoilerPlates:** Predefined texts can be used for the assessor's notes (per drag & drop) - that saves time for the assessment!
- **Document List:** intelligent linking and administration of references to documents (that are necessary for the assessment)
- **Suggestions for improvement** of our customers were taken into account, for example: limitation of capability levels for charts, additional style template "ReportHeading 4" for MS Word reports, corrected spelling and formatting mistakes within the questionnaire, etc.
