News and Updates

Automotive SPiCE PAM 3.1 Update with Multiple Process Instances and Excel Export

2019-04-12 15:16

Assessment Software Update V3.3.8

New: **Multiple Process Instances**

Starting with Software Version 3.3.8 you can choose to assess each process in up to five instances. Simply select the number of instances in the preparation screen for each process (1)... one instance, (2) ... two instances ... etc.
Currently the aggregation method R3 according to ISO 33020 is supported.

New: **Additional Fields for BP+GP Weaknesses**

Following the improvement suggestions of several experienced tool users, the single notes-field is split into two fields: *Notes* and *Weaknesses* for all BPs and GPs.

New: **Excel Export**

An improved version of the new Excel Export is now available - with colored cells for PA, BP and GP ratings. This reporting feature can be used as an interface if you need to export assessment data and results to any other database.

For additional information according the new and improved features, see the readme.rtf delivered with the tool.

The PAM 3.1 released on Nov. 1st 2017 is available with Software Version 3.3.8 of the Assessment Tool SPiCE 1-2-1 for Automotive.

Additionally it still contains the PAM 3.0, released on July, 16th 2015.

Beyond the usual assessment features, the assessor can switch between English and German during the assessment.

Because of structural changes in the process dimension and amongst the generic practices - inspired from ISO 33020 - the assessment files with PAM 3.1 are not compatible with PAM 2.5 (oder 2.4, 2.3) files. Therefore we offer two separate tools: one for PAM 3.1/3.0, the other for PAM 2.5.
